Career Objective:

Aspiring Jr. Front End Web Developer with MERN stack expertise and a passion for creating user friendly applications. Currently a 12th-grade student at Govt. City College, Chittagong, eager to join your company to leverage my skills in HTML, CSS, JavaScript, and React.

Projects :

StudyBuddyCircle :

Live Weblink : [StudyBuddyCircle](#) client github link : [GitHub client](#) server github link : [GitHub Server](#)

StudyBuddyCircle is an online platform for collaborative learning among friends. Users can create and share assignments, collaborate on tasks, and provide feedback. It supports organizing study groups, sharing resources, and tracking academic progress, fostering a supportive and interactive learning environment.

Here are three features of this project :

- **Collaborative Assignment Creation:** Create, share, and manage assignments within study groups.
- **Real-Time Feedback:** Provide and receive instant feedback on assignments
- **Resource Sharing:** Share study materials and resources effortlessly.

SwiftTasker :

Live Weblink : [SwiftTasker](#), client github link : [GitHub client](#), server github link : [GitHub Server](#)

Swift Tasker is a micro-tasking platform enabling users to complete small tasks for rewards, managed through distinct roles for task creators, workers, and admins.

Here are three features of this project :

- **Role-based Task Management:** Tailored functionalities for Workers, Task-Creators, and Admins.
- **Reward System:** Users earn rewards for completing tasks, fostering engagement and participation.
- **Secure Transactions:** Ensures data security and confidentiality for user transactions.

Artistry in Glass & Paper :

Live Weblink : [Artistry in Glass](#) client github link : [GitHub client](#) server github link : [GitHub Server](#)

Artistry in Glass & Paper is an online platform for showcasing and managing glass and paper crafts. Users can browse a curated gallery, upload creations, and update listings easily. Built with React.js, Node.js, Express.js, and MongoDB, it offers a seamless experience for craft enthusiasts.

Here are three features of this project :

- **Craft Upload and Management:** Easily upload, update, and manage craft listings.
- **Customizable Craft Listings:** Detailed descriptions, high-quality images, and customization options.
- **Category-Based Browsing:** Browse crafts by categories for specific searches and inspiration.
